### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

Applicant's arguments, see page 5, lines 12-25 and page 6, lines 1-10, filed 12/6/04, with respect to the rejection of claims 1-10 under 35 U.S.C. 103(a) over Itoh (US 6,283,904) in view of Narita (JP 2002-40755A) have been fully considered and are persuasive. The rejection of claims 1-10 under 35 U.S.C 103(a) has been withdrawn.

It is agreed that Narita et al. do not disclose or suggest that the resistance adjustment layer can include a combination of thermoplastic resin having crosslinkable double bonds and rubber as claimed. The type of thermoplastic that Narita et al. uses does not include cross-linkable double bonds because there is no suggestion or teaching to use cross-linkable double bonds.

After further consideration, it has been determined that there is no provisional double patenting rejection between the instant application and application S/N 10/649,053. For example, the instant invention requires "thermoplastic resin being included in an amount of 5 to 50 wt%" which is not found in the claims of S/N 10/649,053. Application S/N 10/649,053 requires "a resistance adjusting layer formed radially outwardly of said electrically conductive elastic layer" which is not found in the claims of the instant invention. Therefore, the double patenting rejection has been withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
